A SMALL COMPANY – DOING REALLY BIG THINGS.

Paul Martin & Sons began operations in 1988 when Paul Martin turned his small, used equipment sales and rental operation into a full-time dealership. From the beginning, Paul's customers understood the value of personalized and knowledgeable service in farm machinery.

In 2006, Paul's son, Doug, joined the family business. Soon after, Paul's nephew Ted joined the father/son team. They all began a commitment to grow the business by offering several new equipment lines, adding key personnel, and building a service department with professional technicians. This positioned Paul Martin & Sons to be a force in the new and used equipment industry of Northwest Ohio, Southeast Michigan and Northeast Indiana.

As our company has grown, the services we offer to our large customer base has expanded as well. **We know, without a doubt, Paul Martin & Son's has the best products in farm machinery available, and the best people to help your business grow.**

**SINCE
1988**
